EDUCATION

Manipal Institute of Technology (MIT)

Manipal, India

B.Tech in Data Science; CGPA: 7.98

2023 – 2027 (Expected)

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, Database Management Systems, Computer Networks, Software Engineering, Machine Learning, Probability & Statistics

TECHNICAL SKILLS

Languages: Python, Java, C++, PHP, SQL

Frameworks: CodeIgniter 4, React, REST APIs, MVC Architecture

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Docker, Kubernetes, Minikube, Postman, VS Code, Linux

APIs & Libraries: VirusTotal API, Requests, Pandas, NumPy, Scikit-Learn, TensorFlow, Keras

EXPERIENCE

Software Development Intern

May 2026 – Present

Global InfoCloud Pvt. Ltd.

- Collaborate with senior engineers to **design, develop, and implement** backend software solutions for a cloud-native, multi-tenant SaaS HRMS platform built on **PHP (CodeIgniter 4)** and MySQL, following MVC architecture and object-oriented design principles.
- Write, test, and debug high-quality, maintainable code for employee management, role-based access control, attendance, payroll, and leave management modules.
- Design normalized relational database schemas and optimize SQL queries to improve performance, data integrity, and scalability; engage in code review and cross-functional collaboration with Product and QA teams.

Data Analytics Intern

Dec 2025 – Jan 2026

Avaada Electro

- Analyzed over **50,000** manufacturing records using Python and SQL to identify production bottlenecks, uncover process inefficiencies, and support data-driven engineering decisions.
- Designed and built **7 interactive Power BI dashboards** with DAX-based data models for real-time KPI monitoring across production lines, improving visibility for cross-functional teams.
- Developed automated, scripted reporting workflows to replace manual data consolidation, reducing reporting effort by **40%** and improving decision turnaround time by **30%**.
- Collaborated with production and operations teams to translate raw operational data into actionable insights, applying structured debugging and validation to ensure data accuracy and pipeline reliability.

PROJECTS

Multi-Tenant SaaS HRMS Platform | PHP, CodeIgniter 4, MySQL, Tailwind CSS, REST APIs

- Engineered the SuperAdmin module of a cloud-based multi-tenant HRMS platform, implementing tenant onboarding, subscription lifecycle management, and role-based organization administration using MVC architecture.
- Designed normalized relational database schemas and scalable, object-oriented backend modules with RESTful API principles; built and unit-tested responsive administrative dashboards, improving maintainability and code reusability.

RL-Based Stock Trading Agent | Python, Q-Learning, Data Structures & Algorithms, Pandas, yFinance, Matplotlib

- Designed and implemented a modular, object-oriented Python application generating Buy/Sell/Hold recommendations via a custom Q-learning and epsilon-greedy Reinforcement Learning algorithm on live financial data.
- Built a custom state-action-reward framework leveraging RSI, MACD, Bollinger Bands, and momentum indicators, applying algorithmic and complexity-aware design across an end-to-end data pipeline.

CERTIFICATIONS

Generative AI with Large Language Models – AWS / DeepLearning.AI

- Covered Transformer architectures, PEFT, LoRA, RLHF, and production LLM deployment on cloud infrastructure.

Microsoft Data Visualization Specialization – Microsoft

- Built Power BI dashboards using DAX, data modeling, and business intelligence best practices.

LEADERSHIP

PR & Outreach Head

Aug 2025 – Present

The Data Alchemists – Data Science Club (200+ Members)

- Lead cross-functional collaboration for sponsorship outreach, industry partnerships, and technical branding initiatives, coordinating with student teams to organize engineering workshops and events.
